EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph W. Price on 05/11/2006.

2. The application has been amended as follows:

Claim 1 has been replaced with following amended claim 1.

A combination indicator assembly for a motorcycle which comprises:

a generally arcuate analog display unit for displaying the number of revolutions of a vehicle engine; and

a generally rectangular digital display unit disposed the analog display unit, said display unit including a speedometer region and either a multifunctional mater region or a coolant temperature display region for displaying the temperature pf a coolant of the vehicle engine.

REASON FOR ALLOWANCE

3. Claims 1-16 is allowed.

4. The following is an examiner's statement of reason for allowance:

The prior art fails to teach or suggest a combination indicator assembly for a motorcycle which comprises:

Art Unit: 2629

a generally arcuate analog display unit for displaying the number of revolutions of a vehicle engine; and

a generally rectangular digital display unit disposed the analog display unit, said display unit including a speedometer region and either a multifunctional mater region or a coolant temperature display region for displaying the temperature pf a coolant of the vehicle engine as claimed in claim 1.

The prior art fails t teach or suggest a compact instrument display panel for a motorcycle, having a casing assembly with a perimeter approximately defined as a pair of horizontal parallel chords dissecting a circle;

an electrically activated display unit mounted within the assembly;

an overlay member extending across the display unit and having a series of arcuate opening extending around a portion of a rectangular opening; and

a control unit for driving the display unit to illuminate the series of arcuate opening to provide an indicator of engine revolutions per unit of time and to provide numerical symbols in the rectangular opening representative of performance characteristics of the motorcycle including velocity as claimed in claim 6.

The prior art fails to teach or suggest a combination indicator assembly for a motorcycle which having a casing; a generally arcuate analog display unit, in the casing, for displaying the number of revolutions of a vehicle engine; a generally rectangular digital display unit disposed inside the analog display unit, the digital display unit including a speedometer region and a display region for displaying information on the
